Question 1: We are writing to you with a request to correct the technical specifications for Lot III of the recycling bin. Namely, in accordance with the EN standard 840, which defines the appearance of the bin and the size of the waste bin, under the description of dimensions, make a correction and put at least 920 x 480 x 555mm, because the current exact dimensions of the bins cannot be delivered by any bin manufacturer in Europe and beyond, and the current dimensions themselves do not at any time indicate better quality or adaptation to a particular truck. Due to the quality of the bin itself, we also suggest that you correct the weight and put it from the current 7.5kg (+5%) to 7.5 to 9kg, because a heavier bin in this case means better quality and durability. / **Pitanje 1: Obraćamo vam se sa molbom za korekciju tehničke specifikacija na lotu III kante za reciklažu. Naime, sukladno EN normi 840 koja definira između ostalog i izgled kante i veličinu kanti za otpad, da pod opisom dimenzija izvršite ispravku i stavite min 920 x 480 x 555mm, jer trenutne točne dimenzije kanti ne može isporučiti ni jedan proizvođač kanti u Europi i šire, a same trenutne dimenzije ni u jednom trenutku ne označavaju bolju kvalitetu ili prilagodbu nekom kamionu. Zbog samog kvaliteta kante predlažemo i da težinu korigirate i sa sadašnjih 7,5kg (+5%) stavite od 7,5 do 9kg, jer teža kante u ovom slučaju znači i bolju kvalitetu i dugotrajnost.**
